

Kansas Insurance Department

Welcome to SBS 2016!

What is SBS 2016?

The Kansas Insurance Department has successfully completed the transition to a new version of the SBS software "SBS 2016". This new software solution is a full re-write of SBS that combines the best of the original system with the addition of enhanced summary and search pages. Users will benefit from this new functionality by getting access to the information they need using fewer screens and clicks. The Lookup pages become more efficient by allowing users to filter and sort their search results to their personal preference. Use the [SBS 2016 Help](#) section to access functionality descriptions, instructions, and interactive tutorials.

New Industry Tools

State Services Page: Select a jurisdiction from the State Services dropdown to find contact information and links to SBS and NIPR tools available for your jurisdiction.

Lookup: Verify National Producer Number (NPN), license status, license expiration date and much more.
